Product name and model:	Ultra-soft Waterproof Fabric External Corner Patch, CPR119
Manufacturer:	Hebei Zhuheng Technology CO., Ltd
Product description and application:	A reinforced leak-repair product specially designed for the laying of ultra-soft waterproof fabric. Its material combines the comprehensive advantages of thermoplastics and rubber elastomers, adopting a pre-formed right-angle structure processing technology. It is lightweight, highly flexible, and environmentally friendly. It fills the gaps generated when the main waterproof fabric is folded and laid at external corners, forming a reinforced sealing layer to prevent long-term cracking. It is mainly used for reinforcing the waterproof membranes at the external corners of bathroom walls and floors, and can also be used for leak-repairing and reinforcing the external corners prone to leakage in kitchens and bathrooms.
Packaging unit:	200 pieces / Box
Construction:	A multi-layer composite structure of non-woven fabric and functional film

Conmsperm™

Characteristic:

Test items		Standards	Units	Values※
Colour		/	/	Blue
Thickness		EN 1894-2	mm	0.58
Weight		EN 1894-2	g/m^2	434
Breaking load	**CD**	EN 12311-2	N/mm^2	2.44
	MD	EN 12311-2	N/mm^2	9.72
Elongation at break	**CD**	EN 12311-2	%	240
	MD	EN 12311-2	%	64
Low-temperature flexibility		EN 495-5	℃	-30
Temperature resistance		/	℃	-40 to +90
Water resistance class		EN 1928-B	bar	6
Outdoor exposure period		/	months	3
Shelf life		Avoid high temperatures	months	24
